Professional Summary

Full-stack developer with 6 years of progressive experience in designing, developing, and deploying enterprise applications. Skilled in .NET Core, Angular, SQL, and Azure cloud services, with proven expertise in building scalable RESTful APIs and modern web applications. Strong background in collaborating across teams, growing from L1 and L2 roles to Senior Analyst Programmer, and delivering impactful business solutions.

Key Skills

- **Languages & Frameworks:** C#, ASP.NET Framework, .NET Core, Angular
 - **Databases:** SQL Server
 - **Cloud & Integrations:** Azure Functions, Azure Data Factory (ADF), Azure Fundamental
 - **API Development:** REST APIs
 - **Tools & Practices:** Git, Agile/Scrum, CI/CD, Azure Devops, Docker
-

Professional Experience

Xceedance Consulting India Pvt. Ltd. — 2019–Present

Senior Analyst Programmer | 2022–Present

- Led redevelopment of legacy modules by migrating from **.NET Framework + AngularJS** to **.NET Core + Angular**, applying **CQRS** and **Clean Architecture** to boost system reliability and maintainability.
- Maintained and patched **Azure Functions** and **ADF pipelines**; designed new pipelines to support feature rollouts and ensure smooth, scalable data processing.
- Partnered with architects and product owners to design **cloud-based solutions**, improving uptime and application performance.
- Mentored **3 junior developers**, raising code quality and accelerating delivery timelines.

Analyst Programmer (L2) | 2021–2022

- Spearheaded feature development in the **Resource Project**, improving internal resource allocation efficiency by **30%**.

- Built a **calendar module** in ASP.NET + AngularJS to enable scheduling, viewing, and management of customer and broker meetings.
- Optimized SQL queries and stored procedures, enhancing data retrieval speed and application responsiveness.
- Coordinated closely with QA teams, reducing defect resolution time through clearer requirement specifications.

Analyst Programmer (L1) | 2019–2021

- Delivered core backend features in **.NET Framework** and front-end components in **AngularJS** for the **NARS project**.
 - Implemented new features, resolved production issues, and provided ongoing support, improving system stability and user satisfaction.
-

Projects

Resource 2.0 | .NET 8, Angular 19, AG Grid, CQRS, Clean Architecture, Azure Data Factory (ADF)

- Contributed to modernization of the Resource Modernisation Project by rewriting it into a **.NET 8 + Angular 19** stack, improving scalability and maintainability.
- Designed and implemented an insured **configuration module** in **Azure Data Factory (ADF)** using Dataflows for seamless data integration and transformation.
- Developed **insured module user stories**, aligning with business needs and ensuring clean, maintainable code.

Resource Modernisation | ASP.NET Razor Pages, AngularJS, EPPlus, SQL Server

- Developed a **calendar module** for scheduling and managing customer/broker meetings with detailed attributes (location, purpose, participants).
- Implemented **bulk upload functionality** using EPPlus, reducing manual effort and improving user productivity.
- Designed and optimized **complex stored procedures**, integrating with AngularJS for reliable add/edit/view operations.
- Provided production support, resolving critical issues and ensuring post-deployment stability.

NARS | ASP.NET Razor Pages, AngularJS, SQL Server

- Built “**Add Policy Block Module**” to generate policy numbers dynamically based on paper number, prefix, organization type, product, subtype, and region.
- Migrated **Excel data into SQL Server**, ensuring accuracy, consistency, and smooth integration with the application.

- Delivered production support by diagnosing and fixing issues, improving system reliability for end-users.
-

Education

B.Tech in Computer Science

Mahavir Swami Institute of Technology, 2019
